Pratt & Whitney (P&W) has qualified Aqua Blasting Corporation as a source of peening per AMS 2430.

P&W establish controls for chemical and metallurgical processing performed by P&W qualified sources. Compliance with these controls and with applicable specifications is necessary for continued qualification.

Continuance of the qualification also depends on maintaining facilities, procedures, equipment and controls to P&W standards, as determined by our periodic surveys, and on our routine testing of our product. Qualifications for materials and procedures not used on P&W parts for one year may be discontinued at discretion of P&W.

We have reviewed your written processing procedures, and find them to be satisfactory. Copies of these documents, signed and dated, are enclosed. Please have them readily available for review by P&W representatives. Processing shall be in accordance with these approved procedures, and no change shall be made without prior written approval of P&W Quality & Standards Laboratory.

Very truly yours,

A handwritten signature in cursive script that reads "Angel L. Rivera".
